We Build Reliability

Located near Victoria, British Columbia on Vancouver Island, Nicholson Manufacturing Ltd. is a global leader in the design, manufacture and service of ring debarking and log handling equipment for the forestry industry. By choosing Nicholson, our customers benefit from both proven design and innovation. Decades of experience in engineering and manufacturing combine with a continuous improvement culture to bring leading-edge technology to Nicholson's products and services. Purposely designed and built to perform, Nicholson equipment can be found in wood processing facilities around the world. For more information about Nicholson, visit www.debarking.com.

The Opportunity

Nicholson has an immediate opening for a full-time **CNC Machine Operator** at our manufacturing plant in Sidney, British Columbia. The position offers compensation of \$23.39/hour for the first 1140 hours worked and \$29.11/hour after completion of 1140 worked hours. Extended health benefits and pension are provided through the Machinists Local 3 union. Nicholson provides safety training, on the job training and opportunities for career growth.

Requirements

- High school diploma or international equivalent plus post-secondary training in technical automation or CNC machine tool operation is preferred.
- 3+ years of experience operating CNC machining equipment.
- Ability to lift parts weighing 30 lbs. and stand for the duration of the shift.
- Valid driver's license, reliable transportation and available for shift work as needed.
- Experience with Mazak and Fanuc controls are considered an asset.

Responsibilities

- Read, understand, and comply with all Company policies and procedures, including the Employee Handbook, Occupational Health and Safety requirements, and provisions of the Collective Bargaining Agreement.
- Operate a variety of CNC lathes, milling machines and multi-tasking machining centers.
- Read and understand technical drawings, blueprints, written procedures, and verbal instructions.
- Ensure parts are produced to specifications, verify work piece dimensions are correct and made within tolerances.
- Safely operate overhead cranes, forklifts, and power tools.
- Actively participate in, and contribute to, continuous improvement and safety initiatives in the workplace.
